

Implement a Program on Packages.

1)

```
//Save by A.java
```

```
package mypack;
```

```
public class A
```

```
{
```

```
}
```

```
public static void msg()
```

```
{
```

```
System.out.println("Welcome to Package!!");
```

```
}
```

```
//Save by B.java
```

```
package mypack;
```

```
import mypack.*;
```

```
class B
```

```
{
```

```
public static void main(String args[])
```

```
{
```

```
A obj=new A();
```

```
obj.msg();
```

```
}
```

```
}
```

```
