

## **Implement a program on Multiple Inheritance with Interface**

```
class MultInherit{  
    public static void main(String args[]){  
        {  
            Pig a=new Pig();  
            a.animalsound();  
            a.sleep();  
        }  
    }  
  
    interface Animal{  
        public void animalsound();  
        public void sleep();  
    }  
  
    class Pig implements Animal{  
        public void animalsound(){  
            System.out.println("The Pig says: wee-wee");  
        }  
  
        public void sleep(){  
            System.out.println("zzzzzzzz");  
        }  
    }  
}
```

Output:

The Pig says: wee-wee

Zzzzzzzz

```
C:\Users\hp\OneDrive\Desktop\Dhruv Gharat>java MultInherit.java
```

```
The Pig says: wee-wee
```

```
zzzzzzzz
```

```
C:\Users\hp\OneDrive\Desktop\Dhruv Gharat>z
```
